Evacuation or Escalation?

General MacArthur had told General Collins that, under existing conditions, the UN Command would be unable to remain in Korea. General Collins had privately disagreed. But if General MacArthur was right, then a refusal either to send reinforcements or to alter the rules of engagement would render evacuation unavoidable. The prospect had to be squarely faced.⁶³

On 22 December the Joint Chiefs of Staff held a critically important discussion on courses of action in Korea. The occasion was General MacArthur's request, still pending, for National Guard divisions. The Joint Chiefs of Staff agreed that a decision should be made now, "on the governmental level," that US forces would be evacuated as soon as it became apparent that the Chinese Communists intended to drive the United Nations from Korea. An attack in force on UN positions, accompanied by a continuing buildup of enemy forces, would constitute sufficient evidence of such intention, and if it took place, "it must be accepted that we are being militarily forced out of Korea." In any event, the original UN directive, under which the United States had gone into Korea, was now obsolete and should be revised. They directed the Joint Strategic Survey Committee to prepare a memorandum for the Secretary of Defense that would serve to bring these issues to the attention of the National Security Council. Also, General MacArthur was informed that, pending decisions on the above matters, no additional divisions would be deployed to the Far East.⁶⁴

Before the Committee had replied to this directive, the President summoned Secretaries Acheson and Marshall and General Bradley to Blair House on 26 December, to discuss the Korean situation and the possibility of withdrawal. Secretary Acheson stressed that the US objective, resisting aggression "on a collective security basis" for as long as possible, was very clear and was accepted by all present. Reverses, he continued, did not warrant withdrawal; the UN Command was not "hopelessly outnumbered" and it enjoyed the inherent advantage

Code War: Cold War History through Game Modding

In this course, students will delve into Cold War history by transforming the video game *Command and Conquer: Red Alert* into a simulation that captures the strategic dynamics of the era. Each module blends historical insights with technical skills, culminating in a large-scale simulation of Able Archer.

Code War Classification Levels

Course Modules:

1948- Preparing for Winter

- **Focus:** The Yalta and Potsdam Conferences and their role in shaping the post-WWII world order
- **Skill:** Red Alert basic gameplay, strategy, and historical modding
- **Activity:** OPERATION US VS THEM

1949- Cold Shoulder

- **Focus:** The Berlin Blockade and Berlin Airlift
- **Skill:** Game Modding With Yaml Files
- **Activity:** OPERATION COLD SHOULDER

1949- Foreign Fire

- **Focus:** Development of Soviet Atomic Capabilities
- **Skill:** Game Logic with C# and Trait logic
- **Activity:** OPERATION PITTSHTATTAN PROJECT

1950- Enemies From Within

- **Focus:** Espionage and sedition: the origins and rise of cold-war era paranoia
- **Skill:** Trait manipulation in C# and YAML
- **Activity:** OPERATION SHADOW OF THE CURTAIN

HEADQUARTERS

STRATEGIC EXERCISE DIRECTIVE

TITLE: Comparative Analysis and Operational Effectiveness Assessment of U.S. Rifle Companies vs Soviet Rifle Companies - 1948

DATE: JANUARY 8, 1948

TO: ALL ASSIGNED PERSONNEL

FROM: LT. COL. J. J. BOYCE, STRATEGIC PLANNING DIVISION

I. OBJECTIVE:

To evaluate and compare the operational capabilities of U.S. and Soviet Rifle Companies within the context of 1948 through simulated wargaming scenarios in the Command and Conquer: Red Alert 1948 mod. The exercise aims to identify relative strengths, weaknesses, and recommended force adjustments to ensure combat superiority.

II. BACKGROUND:

Tensions along the Iron Curtain in 1948 necessitate a comprehensive analysis of NATO and Warsaw Pact forces. Both sides rely heavily on light infantry, light tank support, light artillery, and light close air support. This exercise will simulate engagements using OpenRA's 1948 mod to determine likely outcomes and highlight areas for strategic improvements.

III. SCOPE:

Participants will conduct a tactical assessment of U.S. Rifle Companies and Soviet Rifle Companies. Analysis will include:

- Unit Composition and Equipment
- Firepower and Mobility
- Defensive and Offensive Capabilities
- Support Assets Integration
- Engagement Outcomes and Tactical Adjustments

IV. SIMULATION PARAMETERS:

1. Forces and Unit Composition
 - a. U.S. Rifle Company
 - i. Platoons equipped with M1 Garand rifles, M35 trucks, and light mortars.

Operations Overview:

Oreadme.txt files:

Placed in relevant directories

Gives directions (Top)
-Make and launch mod

Gives explanations (Bottom)

# RULES DIRECTORY
This directory contains configuration files that define how sprites behave and interact
with the game environment. These files combine visual elements with gameplay logic.

## Purpose of Rules Files
- Assign traits to sprites (e.g., health, speed, attack power).
- Define parameters for those traits (e.g., range, cooldown, durability).
- Specify interactions between sprites (e.g., damage types, movement restrictions).

## Examples of Rules Files
1. 'tank_rules.yaml'
- Assigns traits to the tank sprite, such as:
  - Health: 100
  - Speed: 3 (units per second)
  - Attack Power: 20
- Specifies parameters for firing:
  - Range: 10 units
  - Cooldown: 2 seconds.
2. 'helicopter_rules.yaml'
- Assigns traits to the helicopter sprite:
  - Speed: 5 (units per second)
  - Movement Type: Air
  - Armor: Light
- Defines unique behaviors, like hovering.
3. 'explosion_rules.yaml'
- Specifies the effects of the explosion animation:
  - Damage Radius: 5 units
  - Damage: 50
  - Duration: 1.5 seconds.

## Key Sections in a Rules File
- **Traits**: Define the fundamental attributes of a sprite.
- **Behavior**: Specify how the sprite interacts with other entities and the environment.
- **Parameters**: Provide detailed configurations for traits and abilities.

## Notes
- Rules files are critical for balancing gameplay. Test changes thoroughly to ensure
  fairness and functionality.
- Consistent naming conventions help organize and maintain files.

17 unique soldier types based primarily on

This chart illustrates the composition of an Infantry Rifle Squad during World War II, set against a background of the American flag. The squad is organized into four rows, each representing a different role and its associated equipment:

- Squad Leader:** M1 Rifle
- Assistant Squad Leader:** M1 Rifle/M7 Grenade Launcher
- BAR Man:** M1918A2 Automatic Rifle
- Assistant BAR Man:** M1 Rifle
- Ammunition Bearer:** M1 Rifle
- Rifleman/Grenadier:** M1 Rifle/M7 Grenade Launcher
- Rifleman/Grenadier:** M1 Rifle/M7 Grenade Launcher
- Rifleman/Scout:** M1 Rifle
- Rifleman/Scout:** M1 Rifle
- Rifleman:** M1 Rifle
- Rifleman:** M1 Rifle
- Rifleman:** M1 Rifle

The chart is titled "Army Infantry Rifle Squad" and includes the text "United States of America" and "World War II (Feb. '44 to June '45)". The source is cited as "T/DAE 7-17 (26 Feb. 1944)".

Operation Debrief:

Research notes in comments:

BuildPaletteOrder: 10 #I made this especially small because the Garand Gunner was a common type of soldier. Therefore, it should be an easily available soldier, and should be seen at the beginning so it can act as a fighter before others can be produced.

Mobile:

Speed: 34 #Because the garand guns were heavy and would have hindered movement, I decided to give these infantry a lower speed than some other infantry.

Valued:

Cost: 40 #Cost reduced to negligible based on conscription in Soviet Union

AmmoPool@MOSIN-NAGENT:

Name: MOSIN-NAGENT_ammopool

Ammo: 70 #40 rounds (ready)8x Clips (5 rd) held in 4 leather pouches mounted on the front of belt, 30 rounds (reserve) 6x Clips (5 rd) held in 1 canvas reserve pouch on center back of belt

M1919A4: #usa weapon 1948 IOW Table of Organization No. 7-17N "Infantry Rifle Company" published 16 April 1948

ReloadDelay: 5

Range: 9c0 #adjusted to give additional effective range over M1Carbine

Inaccuracy: 191 #increased inaccuracy based on effective range and the PPS being made as a low-cost personal defense weapon

Situation Report (SITREP) :
